

## Instructions for **Combination Requests**

**Geographic Information System** 

Geographic Information System staff will accept customer requests for combination of parcels for tax purposes only.

Please be aware that the combination of parcels could affect future development of the original lots. It is recommended that you contact the building department in your jurisdiction prior to submitting a combination request to our office.

## Requirements:

- > Per RCW 84.56.340, taxes on all parcels must be paid in full for the year at the time the request is submitted. If you submit your request late in the year and staff is not able to process it until after January 1, the next year's taxes will be due in full before processing.
- The original parcels must be adjoining.
- Ownership must be the same on all parcels.
- The tax code area on each parcel must be the same.

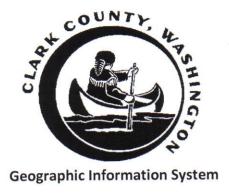

## Please submit the following:

- A completed Combination Request form, including signature of the owner/buyer, date submitted, and a daytime telephone number.
- □ If you have obtained a Lot Determination related to the proposed Combination, please attach a copy.

Note: The processing of combination requests is a low priority. If financing or a sale is dependent on your request being completed, let us know and we will expedite your combination request as quickly as possible.

> If you have questions, please call our office at (360) 397-2002. Dial "0" and ask for Land Records.
